

bizview

CHALLENGE

- Qlik customers are missing a controlled and user-friendly Input capability
- Qlik customer are still using Excel for planning.
- Qlik customers are looking for a modern planning complement to **Qlikview and Qlik Sense**

BENEFITS AND RESULTS

- BizView complements Qlikview and Qlik Sense with a tightly integrated software for all kinds of input.
 - Budgeting
 - Forecasting
 - Data Management
 - o KPI Management
 - Other Planning
- Customers get a seamlessly integrated planning software to complement their existing BI.
- Standardized integrations from and to Qlikview / Qlik Sense and BizView.
- User interface integration. View and analyse Qlik documents including labels (filter parameters) side-by-side with your planning template

With BizView, Qlik customers around the world can finally add input capability to their BI solution. BizView is a superior, tightly integrated planning solution that relieves the frustration of having poor input systems alongside a modern BI solution.

BizView provides a web-based Excel-like user interface combined with powerful workflow management, complementing Qlikview and Qlik Sense with world class planning capability. BizView is an open solution that integrates well with Qlik's business intelligence offerings.

Thanks to the BizView core strengths the customer can be sure to have their planning needs satisfied:

- Excel 'look-and-feel' leverage your existing knowledge .
- Extremely flexible. Excel f(x), db logic, scripting
- BizView is an open solution, ease of integration
- Mix data sources, versions, value types, time units
- Support for approval workflows
- More than financial planning
- Fast and easy to implement

BIZVIEW

 BizView is one of the leading systems for forecasting, budgeting, reporting and consolidation. The software provides a web-based Excel-like user interface combined with powerful workflow management. BizView is an open solution that also fits well with Qlik business intelligence offering. BizView is developed and marketed by Bizview Systems with offices in Scandinavia and is marketed outside Scandinavia by partners. Over 1000 companies use our solutions."

QLIK

Qlik[®] delivers intuitive platform solutions for self-service data visualization, guided analytics applications, embedded analytics and reporting to approximately 35,000 customers worldwide. Companies of all sizes, across all industries and geographies, use Qlik solutions to visualize and explore information, generate insight and make better decisions. At Qlik, we optimize Business Intelligence (BI) by harnessing the collective intelligence of people across an organization. We focus on empowering people-by enabling everyone in an organization to see the whole story that lives within their data. www.qlik.com

BizView and Qlik integration.

Using our standardised ETL database objects, integrating from Qlikview or Qik Sense can be done very easily.

Qlik to BizView: Load the data to a share using load script, pick up the data using our standard ETL objects.

BizView to Qlik: To analyse planning data in Qlikview or Qlik Sense is even more straight forward, one call upon our standard ETL procedure gives you instant representation of the planning data in Qlik

Inside BizView you can also view any Qlik document side-by-side with your planning template, instantly analysing the data when working on your budget by switching seamlessly between workspace tabs.
