Real-time Commentary Capability

Just click + type!

Take your financial reports to another level by adding real-time comments associated with your data. No more confusion or back-and-forth!

Integrating with Vizlib Server guarantees enterprise-grade security through Secure Streams & Access Management.

With commentary hierarchies, you can connect comments to your data and group them by country, user type or department.

Speed up insight discovery by including Viztips in your reports

Add images, icons, charts, and more for additional context that makes financial insights pop!

More Features

+ NPrinting support for PowerPoint and Word

+ Completely secure set up with multiple levels of reporting

+ Add real-time comments to your data

+ Use an unlimited number of alternative dimensions

+ Comment hierarchies connected to your data.

+ Multi-node support for comments.

+ Breadcrumbs functionality for Dimension titles.

+ Expand/collapse options in the context menu.

+ Possibility to extend data in 5 levels of dimensions at the same time

+ Export to Excel with full text formatting and correct number formats

+ Templates for P&Ls and Balance Sheets will cut days if not weeks from your project

+ Use of best practice (included as example) will make your solution easily maintainable

+ Allow rows with completely different calculations like percentages or add some extra key metrics inside your report

+ Use a top dimension or groups of measures to organise your columns. (Groups are easily set up in the extension so no need for complex expressions like in other solutions.)

Common Business Use Cases of Vizlib Finance

1.

Building dynamic and visual reports for your finance department includes P&Ls and Balance Sheets.

Providing a visual layout for reports that conveys the right data story will promote the acceptance of Qlik Sense in the finance department and encourage data exploration.

2.

The Finance Report enables the finance department to maintain and update key properties themselves.

Using the provided templates saves you time and gets you started quicker. Another important benefit of the templates and a standardised script is maintainability. Developers and IT often struggle to maintain other complex finance solutions. For example, when the structure of the P&L changes with the addition of new accounts.

3.

The Finance Report can also be used to create KPI-reports, even those that are non financial.

Key metrics, like the Number of Employees, can be added to a report row and dimensions added for drill-down and comparisons between, for instance, departments, countries and business units.

FAQs

Where can I find information on pricing?

Pricing, including all available user packages, is available for you to view in the Vizlib user portal - you need to login or click the link in your download email to access the portal: <https://www.vizlib.com/protected/upgrade>.

Can I purchase extensions or categories separately?

Every package is designed to deliver a powerful analytics experience and provide you with the tools and features you need to achieve your dataviz goals. This means you can purchase a subscription for the chosen package, but not individual extensions or extension categories. We are delighted to schedule tutorial and demo sessions to help you explore and understand the capabilities of each product better – please get in touch if you'd like to learn more!

Is Vizlib free to trial?

Vizlib is free to trial for up to 5 users.

One Vizlib user license allows an individual to use all Vizlib Extensions within the Qlik Sense environment based on their UserID, regardless of whether they're an app developer, app user or end user. A Vizlib license will account for all use cases for that one named user and is the same as an assigned Qlik Sense Token.

What's included in the subscription?

The subscription includes standard product support and any upgrades and additions we make to the package over time. Typically, we support new versions of Qlik Sense at the time of their release or within a few days.

Do you have a partner programme?

Yes! We run the Vizlib Partner Programme (VPP). To join the VPP you need to be a Qlik certified partner. For more information, please send us an email at support@vizlib.com and we'll be in touch shortly.

Will the extensions work in QAP/QSEoK (mashups)?

Yes!

Will the extensions work in Story Mode?

Yes!

Will the extensions work with nPrinting

Yes!

We build powerful value-added products for Qlik Sense.

Our feature-rich, intuitive Qlik Sense solutions empower data-driven organisations to extend their current analytics capabilities and uncover meaningful insights faster than ever before. We make data talk.

Leveraging our ready-to-use extension products, organisations go from mere data reporting to data storytelling in seconds, significantly boosting their time-to-market for new Qlik Sense projects. We are a valued partner to many of the world's leading businesses that seek fast, effective and branded solutions to boost data adoption across their organisation.

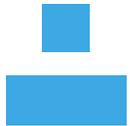

Once you experience Vizlib, there's no going back.
